September 2014

Why Mrs. Park's for *FOUNDATION* years?

It's all about literacy!

Our programs are designed to help your child reach their potential in a safe, fun and nurturing environment.

Our reading specialists use their knowledge to guide each child through the many different ways that learning takes place. We achieve this in small group settings that focus on their academic, social, emotional, creative and physical well being. We want them to enjoy learning.

Options at Mrs. Park's

Every child learns differently. It is our task to assess the child's learning style and then to present the information in a way that best suits them. Young children reach milestones with individual timelines up to age 5.

With this in mind we have a number of options for families. You may or not be planning to enter a "private school" for your child's academic career but would consider having the "private school" experience for what we call the *foundation years*; junior and senior kindergarten. Children are able to remain close to home for the early formative years when they attend neighbourhood programs like ours.

Especially at a time that our public system is forming all day kindergarten classes with large groups, you should have choices. One of our programs may suit your child's needs for the Kindergarten years. To arrange an appointment and speak to our education team, please get in touch with us.

Classes are on a first come, first served basis.
